

PRODUCT DESCRIPTION

Fortress fencing steel crowd control barriers are one of the only barricades on the market that feature dual interlocking hinge points, making them the sturdiest and ideal choice of barrier.

Our fast mounting, interlocking system makes installation a breeze and our panels also offer removable feet, once the feet are removed stacking and storing panels is simple. Low intrusion flat feet prevent trip hazards, come with pre-drilled holes for bolt-down installations and will ensure you meet OH&S requirements, whilst providing maximum safety to workers and pedestrians.

Available in 2 fully welded finishes, galvanised steel silver barrier and highly visible orange powder-coated steel barrier. Feet also available separately for purchase.

The benefits of buying a Fortress Fencing crowd control

- Fully welded, hard wearing barricade
- Feet are available for purchase to replace lost and damage units
- Barriers are lightweight and easy to install
- Panels are able to pivot at the joints
- A better investment than hiring
- Removable feet for stacking, transport and alternate installations
