

BASE PRODUCT CODE

03-AFRAME
03-AFRAMET

PRODUCT DESCRIPTION

The Fortress Fencing A-Frame barriers provide excellent stability and protection for your pedestrians not provided by flagging and star posts. The barriers are tough, which means once purchased they will last multiple projects saving you money. 5.8 meter lengths enable A-Frame barriers to be rapidly deployed, saving time and money on site.

A-Frame barriers are assembled in place and all components are under 20kg, which means fast installation on your site with no injuries.

A-Frame barriers are shipped in kit form saving space in transport, this means that we can ship large quantities efficiently.
