## PRODUCT DESCRIPTION

The Fortress Trafix 2000 Water Filled Barrier is manufactured in Red or White from UV protected polyethylene, designed to resist the harsh Australian sun. Rounded corners and light weight makes this barrier safe to move on site. Built-in handles help with the interlocking process and carrying the barrier when empty.

- 70mm filler, overflow and 50mm drain centrally located
- Material strength tested to AS/NZS 4766:2006
- UV20 Protection to ASTM D2565
- Speed rated to 15km/hr
- Lights and signage brackets moulded on top of barrier
- Recyclable – Eco Friendly
- Strong and user friendly
- No loose pins
- 2m long
- Available in red or white
