Product Certificate – Delta Bloc DB80 6m Barrier

I can confirm that the Fortress Fencing Delta Bloc DB80 Concrete Barriers when installed and locked together by the Delta Bloc patented coupling system as per the manufacturer's instructions have a traffic rating of 100 kph as per AS3845.

Additional fencing on top of the kerb up to 1.2 metres in height (2.0m total height) can be installed and covered with 'anti-gawk' screen or complete block out material without compromising the stability of the product. This applies in wind loadings as per AS1170 rated to 41 metres per second.

Kind Regards,

Jeremy Joyce
