# BENEFITS REALLY STACK UP.

Whatever the project, wherever it is, the benefits of Eco-Hoard make it the right choice for the job.

## **Quick and Easy**

Eco-Hoard panels are easy to assemble which makes for fast installation every time. Plus they are lightweight and easy to transport in vans or pick-ups.

## **Strong and Secure**

Strong fabricated steel supports make Eco-Hoard panels extremely stable and safe. High impact resistance makes them sturdy although they only light to handle. Complete panels attach to each other securely in next to no time.

## **Flexible and Versatile**

As Eco-Hoard is a modular system, this gives it greater flexibility and versatility. The panels can cover any length and go around corners perfectly. They can also easily incorporate recesses to fit around the main features and the landscape of the site.

## **Cost Effective**

With Eco-Hoard, there are no nails or screws. That means no damage to the panels so you can use them again and cut costs.

The panels are easily relocatable. They can be re-sited quickly which is ideal for phased projects.

There are whole life savings as well Eco-Hoard panels cost more than timber, but it only takes several reuses to make whole life costs substantially cheaper.

## **Clean and Professional**

Eco-Hoard provides a clean, attractive surface that conveys a professional image.

Company logos and four colour images can be printed on the panels, or vinyls can be attached onto them.

The panels are easier to maintain and do not require painting.

## **Eco-Friendly**

Replacing timber or steel hoardings with Eco-Hoard substantially reduces your company's carbon footprint.

All Eco-Hoard panels can be recycled and made in to new panels or other plastic products.

## **Service and Safety**

Eco-Hoard customers are assured of reliable service as we respond quickly and professionally to meet our clients' requirements.

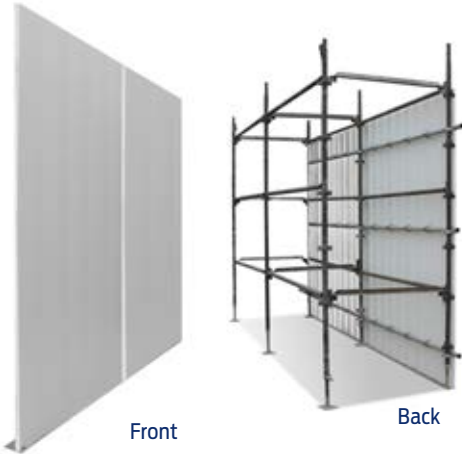

They can also be certain that safety is paramount as full risk assessment method statements are always supplied to them.
